Information

Date/ Time: Saturday, December 7, 8 am – Late Afternoon
Meet at: Cottonwood Visitor Center
Cottonwood exit off of Highway 10
Instructor: Kevin Powell, Guidebook Author, Photographer

Overview

This strenuous, cross country hike takes you to the top of the seldom visited high point of the Hexie Mountains, Monument Mountain (elev. 4814'). The Hexie Mountains are a small range of west to east running mountains within the Park. They begin at the southern end of the sprawling Queen Valley along the Geology Tour Road and end near the Cottonwood Visitors Center. They are rugged and seldom visited. This 6.4 mile round trip hike follows the southeast ridge of the mountain up to the base of the rocky, cone shaped summit, where an easy rock scramble leads to the top. Along the route of ascent you may see bighorn sheep, a non-native game bird known as a chukar (similar to a quail) and a unique geologic feature in the form of a white quartz dike that has fragmented into a million little pieces. Once on top there is a commanding 360 degree view that includes the Cottonwood, Eagle and Pinto Mountains, and portions of the vast Pinto Basin. Total elevation gain is 1700'. **Participants will need a high clearance vehicle for the 5 mile drive to the trail head. Carpooling will be necessary due to the very small parking area. Closed toe hiking shoes required**
